

SMART CITY CONSULTING

About Us

APEX Smart Consulting Services is an INTUS Smartcities Group of experts that will help municipalities and industries understand the reasoning of the “SmartPolis” Infrastructure model from an engineering perspective, develop the legal frame and municipal bylaws for its proper implementation, and finally, develop a suitable financial model and source proper financing. APEX believes that smart cities are the future of urban development, with people at the heart of the process. We advise policy makers, executives, city departments, developers, and industries on the best ways to become a smart city. Our range of services will help deliver on the promise of improving the cities of tomorrow.

Why Choose Us

APEX Smart Consulting helps to mesh activities between people, economies and administrations. Our solutions help save resources, drive economic growth, and evolve living standards. Acting sustainably and responsibly will also have a positive effect on a city's surrounding environment. The basis of these processes is a smart administrative solution which guarantees innovation in the fields of engineering, development, maintenance, mobility, emergency response and technology.

- Experience in Smart City Development

- Comprehensive Asset Management
- Web-GIS Integration Solutions & SaaS Model
- Citizen Participation & Smart Phone Solutions
- Emergency Response Systems and Programs

HELPING CITIES GET

SMARTER & SAFER

SERVICES & SOLUTIONS

Our Services

APEX offers a wide variety of consulting services in order to ensure that cities have all the resources to become smarter.

Engineering Services

Procedures & technologies for proper and cost effective infrastructure installation using North American technologies. Proper pre-engineering and design approaches to secure environmental and public safety. Advanced health & safety procedures to reduce labor accidents and public risk. We help provide clients the know-how so that every engineering project is planned and managed to perfection.

Legal Services

APEX helps cities create bylaw legislation for proper urban planning and infrastructure design & installation, as well as damage prevention legal frameworks and guidance on recovering damage costs.

Financial Services

APEX can advise municipalities on where and how they can find the resources to modernize their infrastructure and services to INTUS Smartcities standards..

INTUS Smartcities' 13-Step Integration Solution

APEX is able to provide a 13-Step process that can migrate a city into our Smartpolis platform. Through the use of proprietary technologies, APEX is able to work with its partners and integrate infrastructure data into a Web-GIS platform. This Web-GIS platform is a cost effective method of managing all types of city operations while also enhancing safety and security to improve citizen participation.

Through Web-GIS and software add-ons, cities will be able to expedite permitting, establish damage prevention measures, constantly alter geographic data, dynamically manage utilities, provide apps and services for citizens, implement full-scale SaaS, and used advanced augmented reality technologies for emergency response and utility construction.

Partnership with Smartpolis

APEX has partnered with Smartpolis to provide its 13-step integration solution. Smartpolis is an innovative digital infrastructure model which makes cities more efficient, prosperous and smarter. Through the use of transformative technologies and IoT (Internet of Things), Smartpolis is able to provide cloud-based solutions for both citizens and municipalities. Smartpolis helps to better connect citizens and municipalities with one another to improve the lives of people, and to boost productivity, health, safety, and connections within the community.
